

INTERACTIVE RIDES, INC.

FOR ALL YOUR AMUSEMENT NEEDS

January 5, 2008

Interactive Rides, Inc.

Press Release for new ride: Edge Coaster

Location: Cebu Philippines (island) 38th floor of the Crown Regency Hotel

Opened to the public December 10th 2008

Height: 430 feet above ground level

Track length: 389 feet long

Vehicles: 4 with two passengers each

The passenger vehicles tilt forward up to 65 degrees while moving sideways down the track. When this tilt occurs the passengers are looking straight down at the ground over 430 feet below. The tilt of the vehicles is controlled by the passengers by two levers which are mounted on top of the lap bars restraint. The two passengers have to move the lever up or down based on what they want to happen and the levers also have to be in agreement in order to make the vehicle rise and tilt them towards the ground. Please contact me with any additional questions.
